

# VAC – THE WORLD'S LEADING MANUFACTURER OF MAGNETICALLY SHIELDED ROOMS

## One-Stop Shop – from raw materials to the finished Magnetically Shielded Room (MSR)

### VACOSHIELD®

- More than 30 years of experience in design and construction result in superior product quality
- Optimum shielding performance over the entire frequency range from DC up to 1 GHz
- High quality standard shielding rooms
- Customized solutions possible

### ADVANTAGES OF VAC MSR

- More than 150 MSRs have successfully been installed worldwide
- Preselection of top quality material lots
- Excellent R&D, engineering and customer support
- Great design flexibility
- Measurements of environmental disturbance
- Fast set up and construction times
- Modular design allows dismantling and reassembly at other sites

# VACOSHIELD

VAC is offering the following three MSR solutions as standard products, all made with VAC's nickel-iron high permeability alloy MUMETALL®.

## VACOSHIELD BASIC

VACOSHIELD Basic is the basic version, aiming towards weight and cost reduction. The core material of prefabricated wall elements is very light and at the same time provides stability to the MSR. Due to the reduced weight, VACOSHIELD Basic can be placed on upper levels.

## VACOSHIELD ADVANCED

VACOSHIELD Advanced is VAC's top-selling two-layer MSR solution. The complementing highly conductive aluminum layer provides the necessary magnetic shielding at higher frequencies. The rooms are built with a special I-beam construction that gives stability and fulfills static requirements.

## VACOSHIELD PREMIUM

The Premium version is an upgraded three-layer MSR product. It is used at sites with over-average environmental magnetic noise.

## CUSTOMIZED SOLUTIONS

VAC is offering customized high-end MSR designs.
